

**Official Greetings of Deutsche Bank AG
Private Wealth Management for the
Maybach family foundation**

Foundations are the most understated business form. Over hundreds of years they have done good deeds and have become an indispensable and enduring influence on our civilization.

With that in mind, it is a conscious responsibility that is the most important motivation for starting a foundation.

The most honest corporate responsibility is built on a foundation of a personal history. By nurturing the Maybach History, the Maybach foundation opens much more than a portal to the story of one of the most heritage-rich Automobile Brands:

It provides insight to an important chapter in German corporate tradition.
